November 16, 2015

Dear MEDICA Guests:

Thank you for your interest in the great State of Florida. Our state offers all of the resources necessary for companies to grow and be successful. The state’s pro-business climate is among the best in the nation – ranked as the second best business state in the United States by Chief Executive Magazine – with low corporate taxes, zero personal income tax, and a highly-skilled and diverse workforce. Since December 2010, Florida has added more than 896,900 private-sector jobs and the state’s private-sector job growth rate, now at 3.9 percent, has exceeded that of the nation since April 2012.

From biotechnology and pharmaceuticals, to medical device manufacturing and healthcare, Florida is a great place for your business to grow. Florida is home to more than 1,100 biotech, pharmaceutical, and medical device companies; and a foundation of more than 46,000 healthcare establishments. Florida is second among states for FDA-registered medical device manufacturing facilities and more than $1.2 billion is spent annually on life sciences research and development by Florida universities.

Florida truly is the best state in the nation to do business, and we hope you consider the Sunshine State when selecting a location for your next facility.

Sincerely,

Rick Scott
Governor
Florida is home to some of the nation’s most highly regarded research centers.

More than 1,100 biotech, pharmaceutical and medical devices companies are located in Florida.

For More Information:
enterpriseflorida.com/lifesciences
Florida has more than **46,000** healthcare establishments.

Florida ranks #1 in FDA applications of medical devices.

Florida ranks 2nd for FDA registered medical device manufacturing facilities.

Airon Corporation is dedicated to the development, manufacture and distribution of pneumatic respiration products for emergency and critical care. Airon’s core products are ventilators and CPAP systems for use in Hospitals, air transport and Emergency Medical Systems. These ventilators and CPAP devices are ideal for disaster preparedness and transport of critically ill patients. All products are fully MRI compatible. Our pNeuton Ventilators have been in clinical use since 1986. See the rugged versatility and wide patient range that makes pNeuton the most comprehensive choice in transport ventilation.

Please ask us about our multiple international distribution opportunities.

Product/Service
AOTI is focused on providing and developing our patented non-invasive Topical Wound Oxygen (two2™) therapy products that both reduce healthcare costs, and improve patient’s quality of life by resolving debilitating chronic wounds. Our products are small, easily transportable and available in reusable and single-use models, allowing for application of the treatment at virtually any care site, from the hospital to the patient’s home. These unique products now mean that any wound care patient at virtually any location can receive targeted therapy and long sought after “complete wound closure”. 
Apira Science, Inc. is a global leader and decade-plus pioneer in Low Level Light Therapy (LLLT) for hair and skin and is creator of the iGrow Hair Growth System and iDerma Facial Beautification System.

The iGrow Hair Growth System is a home use wearable, hands-free device for the treatment of thinning hair that has been clinically proven to promote hair growth in both men and women. iGrow is FDA cleared and uses Low Level Light Therapy (LLLT) to stimulate cellular activity and improve the natural function of the hair follicle. Unlike pharmaceuticals and topicals, the iGrow reverses hair loss with no side-effects. It is simple to use, fully portable and compatible with worldwide voltages.

The iDerma Facial Beautification System provides wearable, hands-free photofacial treatments at home to enhance overall skin condition, diminish the appearance of fine lines and wrinkles and make skin look more supple and radiant. iDerma utilizes a combination of red and infrared LEDs and patented Derma Pulse Technology™ to help reverse the visible signs of aging by stimulating deep cellular regeneration, leaving the skin looking more refreshed, toned and clear within only a few weeks.

Product/Service
Endoscopy Replacement Parts, Inc. is a full service precision manufacturing facility specializing in the development of the highest quality flexible and rigid Endoscope replacement parts available today. Our products include Insertion Tubes, Coil Pipe Assemblies, Eyepieces, Biopsy Channels, Repair Tools, C-Covers, Air Water Nozzles, Leak Test Equipment and many other endoscope repair parts. Using the latest in 3D design, reverse engineering, and manufacturing technology, we strive to deliver superior products, meet and exceed customer expectations, and build long lasting business relationships.
Excite Medical will manufacture and distribute state of art non-surgical spinal decompression machines treating Lumbar and Cervical regions of the spine. The spinal decompression devices will be created to assist health care providers in their effort to treat low (lumbar) back pain.

The lumbar spinal decompression equipment provides a primary treatment modality for the management of pain and disability for patients suffering with incapacitating low back pain and sciatica. The system was designed to apply spinal decompressive forces to compressive and degenerative injuries of the spine. It has been found to provide relief of pain and symptoms associated with herniated discs, bulging or protruding inter-vertebral discs, degenerative disc disease, posterior facet syndrome, and sciatica.

Currently Excite distributes devices in use in over 45 countries. Distribution opportunities available in many major countries. Come visit our booth and experience genuine integrity in the life sciences arena.
Genadyne Biotechnologies is a US based developer and manufacturer of negative pressure wound therapy systems, including disposable and manual NPWT units and wireless telemedicine solutions for wound care.

A support surface division with non-powered and powered pressure relieving therapeutic surfaces. Genadyne also offers a complete full line of wound healing products including collagen and alginate dressings to advance bio cellulose wound matrix systems, that are posed to change the landscape of patient care.

Genadyne’s woman’s health division (Lucina Care) introduces the worlds most advanced multiuser hospital grade breast pump that fits in the palm of your hands.
GENICON is recognized as an emerging leader in the design, production, and distribution of patented surgical instrumentation focused exclusively within the field of laparoscopic surgery. Founded in 1998 and based in Orlando, Florida, GENICON is a privately held firm in which several of our shareholders are surgeons who utilize our products. We are an ISO 13485 Certified and Registered firm which is regulated by the U.S. F.D.A. of which our entire product offering is market approved. Our growing company is driven to meet the needs of modern-day healthcare through the harmonization of clinical needs and the economic demands of a diverse and dynamic global healthcare system.

Product concepts and ongoing development originate from a distinguished panel of surgeons within the company’s Clinical Product Review Board. The panel includes General, Gynecologic, Urologic and Pediatric Surgeons who provide insight to product design that will meet the needs of our global surgeon client base. Our Research & Development team, comprised of mechanical and electrical engineers, is richly experienced in medical device design and manufacturing, and brings these concepts to reality.

Sunoptic Technologies™ offers two lines of branded surgical products as well as private label opportunities together with design, customization and certification services.

Products include: Xenon light sources, LED light sources, surgical headlights, fiberoptic and battery operated LED headlights, HD headlight cameras, video recording devices and fiberoptic cables.

Sunoptic Technologies™ delivers outstanding market-oriented products combining high quality with exclusive distribution and world wide support.
US DEFIB is a manufacturer of high-quality medical devices at a very competitive price. The company always focuses on developing the highest technology to compete with their competitors all over the world. US DEFIB also maintains a stock of products, providing the best service for its clients. Our major product lines for export are defibrillators and AED’s. US DEFIB’s equipment is well known for its quality and ease of use.

US DEFIB manufactures two kinds of Defibrillators: The Biphasic Defibrillator Monitor and The Automated External Defibrillator. These simple-to-use units are designed to analyze the heart rhythm itself, and then advise the user whether a shock is required. They are designed to be used by lay persons, who require little training to operate them correctly. They are usually limited in their interventions to delivering high joule shocks for VF (ventricular fibrillation) and VT (ventricular tachycardia) rhythms, making them generally of limited use to health professionals, who could diagnose and treat a wider range of problems with a manual or semi-automatic unit.

www.gaumard.com

Product/Service
Gaumard® provides innovative simulators for emergency care, nursing, OB/GYN, and surgery worldwide as part of our global commitment to healthcare educators. Our journey began in 1946 with the introduction of a synthetic human skeleton followed by a child birthing simulator in 1949.

Sixty years later Gaumard offers hundreds of simulators including a growing family of advanced tetherless simulators which eliminate the need for bulky compressors, external communications modules, wires, and hoses. Each simulator is supplied with a tablet PC with communications up to 300 meters and software that is actually easy to use.

Our proven tetherless technology powers the next generation of simulators and allows care givers the opportunity to treat simulators like real people in any teaching environment.

See Victoria®, TORY™, HAL®, NOELLE®, Susie®, as well as our pediatric, newborn and preemie simulators. The journey that began in 1946 continues and we welcome new and challenging requests. Your simulation center deserves the very best.

Infinium® specializes in patient monitoring design and manufacturing. Parameters range from ECG, SPO2, Temp, and NIBP to advanced Anesthetic Gas Monitoring, Cardiac Output, and BIS. Additionally, Infinium is a developer for anesthesia machines, surgical tables, and LED surgical lights.

Our latest device named CLEO is a low cost ETCO2 monitor that can also perform SPO2 & NIBP monitoring. The CLEO utilizes many forms of data sharing to integrate with the many types of EMR systems in Hospitals and Clinics throughout the world. With a screen size of only 5” and a user friendly operating system, the CLEO is perfect as a continuous bedside monitor or spot check/transport monitor.

FDA approval for CLEO was obtained in early 2015; additional approvals are pending.

Product/Service
Headquartered in Largo, Florida, BioDerm is one of the leading manufacturers of hydrocolloid products for urinary management, infection control and skin protection. The company challenges accepted standards of care by creating products that reduce infection rates, add comfort and reliability, and vastly improve quality of life.

BioDerm manufactures urology, skin interface, and catheter securement products. BioDerm's products are made from the company's proprietary hydrocolloid that is hypoallergenic, latex free, and moves like a second skin. The skin-friendly adhesive helps prevent skin tearing and irritation.

Our product portfolio includes: 1) Men's Liberty™, a male external catheter designed especially for community dwelling men; 2) Safe n’ Dry™, a hydrocolloid external catheter designed for institutional and hospital use; 3) CathGrip®, a universal catheter securement system with soft no-slip grips that secure tubes from 2-47Fr; 4) BioPlus+™, a no-sting barrier prep wipe that improves adhesion by 50%; and lastly, FreeDerm™, a revolutionary adhesive remover that instantly releases hydrocolloids, tapes and other bandages.

Product/Service
MediCapture Inc. has been the industry leader in the design and manufacture of solid state medical video recorders since 2002.

MediCap® medical video recorders save high definition video and images directly to a hard drive, flash drive or directly onto a network.

They work with all types of medical video devices including endoscopes, surgical microscopes, ultrasounds, and more.

MediCapture products are certified for medical use throughout the United States, Europe, Asia, and Latin America.

MediCapture also offers complete medical video recording solutions to OEMs and integrators.

Product/Service

Whether your company seeks to connect with manufacturers or develop a presence in the U.S., the state of Florida can help you reach your goals. Enterprise Florida, the lead economic development organization for the state, can help your company through confidential location assistance, trade assistance, and by facilitating the development of key relationships to bring your business to Florida and reach U.S. and Latin American markets.
Four Reasons
Why Florida is Vital to the Life Sciences Industry

INDUSTRY HUBS
Jumpstart your next innovative venture in one of Florida’s thriving life sciences hubs.

Move over, Research Triangle. Florida is home to several growing life sciences hubs, including Lake Nona Medica City, UM Life Science and Technology Park, Florida Hospital Health Village and UF Innovation Hub. With the framework for cutting-edge research and manufacturing already in place, you’ll be up and running in no time.

COMPETITIVE COSTS
Maintaining a healthy bottom line is easy in Florida.

With no personal income tax, pro-business leadership and the #1 tax climate in the Southeast, Florida gives you a competitive edge by keeping costs low. If you’re an entrepreneur looking for backing you’ll appreciate that Florida is regularly ranked among the top-10 states for venture capital investment.

R&D FOCUS
Florida’s world-renowned research institutes place you at the heart of cutting edge medicine.

Florida is home to leading research hospitals and institutes such as Scripps Florida, Sanford-Burnham, Torrey Pines, Draper Laboratory and more. Florida universities are equally dedicated to state-of-the-art research, investing more than $1 billion in life sciences R&D each year.

TALENT
Florida’s exceptional workforce will breathe new life into your organization.

In addition to Florida’s 684,000 healthcare workers, you’ll find another 25,000 industry professionals employed by the 1,100+ biotech, pharma and medical device companies across the state. Regardless of your specialty, you’ll find the talent and expertise your company needs to thrive.
Did you know that Florida is home to the second highest number of exporters in the United States and is the seventh largest export state in the country?

Now, there’s a way to get in touch with those companies. The Florida Export Directory is your free, online source for thousands of Florida suppliers of products and services in over 30 industries—all in one place. You can search by industry category, keyword, geographic markets, or company name. Visit their websites, view company and product brochures, then contact them about products, pricing and more. It’s all within easy reach at FloridaExportDirectory.com.
